WORK EXPERIENCE

TravelTribe

Co-Founder & CEO

Zürich, Switzerland

09/2024 – Present

- Spearheaded company strategy, legal infrastructure, and compliance (including the Package Travel Act/PRG), alongside defining the technical vision and managing contracts.
- Led end-to-end event organization, logistics, and IRL experiences, leveraging 10+ years of event management expertise, including formerly operating a proprietary event label and coordinating international group trips to 30+ countries.
- Led cross-functional project execution and budget allocation, while independently architecting the full-stack platform (traveltribe.ch) for user bookings and secure payments.
- **Keywords:** Product Management, Technical Leadership, Event Logistics, Strategy & Legal, Java 21, React, AWS
- Learn more: traveltribe.ch

TWINT

Software Engineer & Release Manager

Zürich, Switzerland

02/2024 – Present

- Led the Direct Debit project within the Value Stream Payment team, and successfully transitioned into the Release Manager role overseeing the entire TWINT ecosystem deployments.
- Developed and maintained highly available payment processing services and robust reporting pipelines to comply with strict SDPA privacy regulations.
- **Keywords:** Release Management, Java, Spring, Wildfly, SQL, Oracle DB, Elasticsearch, Kafka, Kubernetes
- Learn more: twint.ch

UBS

Software Engineer

Zürich, Switzerland

07/2021 – 01/2024

- Engineered resilient backend microservices for the E-banking platform and the UBS Digital Mailroom team, enabling secure account opening, document digitalization, and money transfers.
- Implemented secure document e-signature solutions, optimizing high-traffic APIs and XML databases.
- **Keywords:** Microservices, REST, SOAP API, Kafka, Spring, Tomcat, PostgreSQL, Docker, Kubernetes
- Learn more: ubs.com

CERN

Software Engineer Intern

Geneva, Switzerland

06/2020 – 05/2021

- Built scalable network and communication tools including the CERNphone application, developing robust ETL pipelines to stream large-scale data into Oracle and Elasticsearch databases.
- Created real-time Kibana dashboards for abuse control and operational reporting across the organization.
- **Keywords:** ETL Pipelines, Java, Spring, Kubernetes, Oracle, Elasticsearch, Angular, JavaScript, WebLogic
